

Muhammad Nur Azim Bin Abdul Halim

Full Stack Development | Software Engineer | Web Developer

Email: azimhebat666@gmail.com | Phone: +60163495594

LinkedIn: www.linkedin.com/in/muhammadnurazim | Portfolio : <https://azimhalim.my.canva.site>

PROFESSIONAL SUMMARY

Aspiring Full Stack Developer with a strong foundation in front-end and back-end development, database management, RESTful APIs, and Agile software development. Hands-on experience developing responsive web applications, WordPress solutions, and a web-based Permit-to-Work (PTW) Management System through internship and academic projects. Proficient in HTML, CSS, JavaScript, Python, C#, MySQL, and Git, with a passion for building scalable, user-focused applications and continuously expanding technical expertise.

EDUCATION

Bachelor of Computer Science(Hons.) Multimedia Computing

Universiti Teknologi MARA (UiTM) | 2024 – 2026

Diploma Computer Science

Universiti Teknologi MARA (UiTM) | 2021 – 2024

WORK EXPERIENCE

Software Engineer | UpTime Pro Engineering Sdn.Bhd | March 2026 – July 2026

Tools: Visual Studio Code, phpMyAdmin, MySQL, GitHub, Xampp, Figma, Draw.io

- Developed a web-based Permit-to-Work (PTW) Management System prototype to digitize permit request handling, approval workflows, and workplace safety management processes.
- Performed requirement analysis and business process analysis to translate operational needs into functional system requirements.
- Modeled business workflows and designed system processes to improve efficiency and streamline permit approval procedures.
- Designed user interfaces and database structure to support permit submission, approval tracking, and safety management.
- Applied Agile methodology throughout the project, participating in iterative planning, feature development, testing, and continuous improvement.
- Produced technical documentation, including workflow diagrams, use cases, and functional requirements, to support system development.

Website Developer | ICC, UTHM | September 2023 – February 2024

Tools: PHP, MySQL, HTML, CSS, JavaScript, Bootstrap

- Developed a web-based Intellectual Property (IP) Management System to streamline the management, storage, and retrieval of IP records using MySQL.
- Designed and implemented frontend interfaces and backend functionalities, integrating business logic with database operations.
- Developed CRUD functionalities for IP records, ensuring efficient and reliable data management.
- Improved application usability by creating responsive and user-friendly interfaces for staff and administrators.

- Collaborated with team members to perform system testing, debugging, and validation, ensuring application stability, functionality, and data accuracy.

CERTIFICATION

Python Programming Fundamentals | Top Coders Malaysia | 2024 & 2025

Completed the annual Python Programming Fundamentals workshops in 2024 and 2025, strengthening knowledge of Python syntax, problem-solving, and programming best practices. Demonstrates continuous learning and commitment to improving software development skills relevant to full-stack and backend development roles.

SKILLS

Programming Language: Python, Java, JavaScript, C#, C++, HTML5, CSS3

Backend Development: Node.js, Express.js, PHP, REST API Development, API Integration

Tools: GitHub, Visual Studio Code, MySQL Workbench, XAMPP, Draw.io, Linux Ubuntu, WordPress (Elementor, Yoast SEO), Hostinger, Figma

Methodologies: Agile, Software Development Life Cycle (SDLC)

Additional Skills: SEO Optimization, Web Performance Optimization, Database Design, UI/UX Design

PROJECTS

Permit to Work System | HTML, CSS, JavaScript, Node.js, Express.js, MySQL, REST API, GitHub, XAMPP | 2026

- Developed a web-based PTW management system to automate safety permit workflows, contractor management, and approval processes.
- Built modules for permit submission, MOS approval, work execution approval, competency management, inspection checklist, and role-based dashboards.
- Designed and integrated REST APIs for user management, permit tracking, workflow validation, and database operations.
- Performed system testing and debugging to improve workflow reliability and resolve integration issues.
- Delivered a functional prototype that enhanced workplace safety monitoring and reduced reliance on manual permit documentation.

Intellectual Property Management System | PHP, MySQL Workbench, HTML, CSS, JavaScript, Bootstrap | 2024

- Developed a web-based Intellectual Property Management System from scratch to manage intellectual property records for multiple university faculties using PHP, MySQL Workbench, HTML, CSS, JavaScript, and Bootstrap.
- Designed and implemented a relational MySQL database, developed CRUD (Create, Read, Update, Delete) functionality, and integrated the frontend with the backend to enable efficient data management and retrieval.
- Built responsive user interfaces and database-driven workflows, enabling centralized storage and management of intellectual property records while improving data accessibility and reducing manual record handling.

Car Rental Management System | PHP, MySQL, HTML, CSS, JavaScript, MySQLi | 2025

- Developed a full-stack web-based car rental management system using PHP, MySQL, HTML, CSS, and JavaScript, enabling customer registration, authentication, vehicle search, rental booking, and profile management.

- Designed and implemented CRUD functionality for vehicle inventory, rental bookings, and user accounts, including session-based authentication, image upload handling, and automatic rental duration and price calculations.
- Integrated a MySQL relational database with responsive frontend interfaces and an administrative dashboard, streamlining vehicle inventory management and rental operations through efficient database-driven workflows.

KongsiRasa – Recipe Sharing Management System | PHP, MySQL, HTML, CSS, JavaScript, Bootstrap | 2025

- Developed a full-stack recipe-sharing web application using PHP, MySQL, HTML, CSS, JavaScript, and Bootstrap, enabling user authentication, recipe browsing, search, recipe management, and profile updates through a session-based system.
- Designed and implemented CRUD functionality for recipes, comments, user profiles, and subscriptions, including image uploads, PDF payment proof submission, and role-based access control for administrators.
- Integrated a MySQL relational database with responsive frontend interfaces and an administrative dashboard to manage users, recipes, subscriptions, and administrator accounts while providing dashboard statistics through SQL queries.

LEADERSHIP & ACTIVITIES

- AJK Logistic & Technical – Program SULAM : PROJECT E-ADAB: Digital Ethics For Youth (2026)
- Volunteer – Soopa Dopa UiTM Jasin (2025)
- Multimedia Support Intern – Research Innovation Symposium Exhibition (2023)
- SULAM Community Service Program – UiTM Segamat (2023)

HONOURS & ACHIEVEMENTS

- Dean's List – Semester 2 (2022)
- Dean's List – Semester 4 (2023)
